HOW DOES IT WORK?

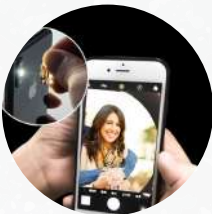

CLOSE-UP VIEWING:

Bring the projection lens close to your eye, much like looking through a magnifying glass. Look closely into the center of the crystal or lens, you will see the hidden message or image.

FLASHLIGHT METHOD:

Find a dark or dimly lit space, use a bright light source such as a flashlight or the flashlight on your phone. Hold the jewelry so the lens faces the surface you want to project onto (e.g., a wall or your hand). Shine the light through the lens. The hidden image or message will be projected onto the surface. Adjust the distance between the jewelry and the surface for the clearest image.

PHONE CAMERA METHOD:

Open the camera app on your phone, hold the projection jewelry in front of your phone's camera lens. Zoom in until the hidden image or message becomes visible on the screen. You may need to adjust the distance between the jewelry and the camera lens for clarity.
